Quality Comes First

Your choice of cabinetry makes a personality-defining statement in your home. Selecting the right cabinets is an important first step because your cabinets should be just as functional on the inside as they are beautiful on the outside. Cabinets should withstand the demands of daily use, and maintain their integrity throughout their lifetime.

That's why quality comes first at NorthPoint Cabinetry. Every detail is carefully considered to ensure our cabinets not only meet our high-quality standards, but yours as well. Our commitment to quality combined with our on-trend finishes, door styles and product depth and breadth are what make NorthPoint Cabinetry the perfect choice for your project.

It Starts with Quality Wood

Just as a healthy tree needs strong roots to thrive, so too does a quality cabinet require premium lumber at its core. Our cabinets feature a **solid wood construction**, so the quality of wood is of utmost importance.

Structural Integrity

Meaningful yet hidden reinforcements, like solid wood corner blocks and strategically placed pocket screws, help reinforce the structural integrity of the cabinet. Take comfort that these well-constructed cabinets will stand the test of time.

Thoughtful Craftsmanship

Boasting an innovative dovetail and hidden pocket screw construction, these cleverly designed cabinets result in robust quality and quick, accurate assembly.

Pretty on the Inside Too

NorthPoint Cabinetry features a clean and beautifully finished birch interior that enhances the cabinet's luxurious, high-quality appeal.

Premium Drawer Boxes

Dovetail joinery is the hallmark of high-quality drawer boxes. The finished interior of the drawer boxes coupled with the dovetail construction, and silky-smooth concealed slides make this drawer box the star of the show.

Hardworking Hardware

Our cabinets feature discreet compact hinges and concealed undermount slides. The hinges & slides have been 3rd party tested and exceed industry standards. The Premier collection (shown) features full extension slides so that you can easily access and make use of the whole drawer.

Sturdy Shelves

NorthPoint Cabinetry shelves are constructed from an impressive $\frac{3}{4}$ " thick, veneered plywood. This means that you don't have to worry about shelves sagging under pressure of normal use. Shelf height is adjustable so that you can optimize storage space for your needs.

Expert Finishing

Count on consistent, high-quality finishing. Our state-of-the-art manufacturing facility utilizes a multi-step professional finishing process. This meticulous process guarantees that finishes maintain a high degree of color and application accuracy from cabinet to cabinet, which means that your cabinets will look stunning.

Our cabinets and accessories feature water-based ultraviolet (UV) finishes. Water-based UV finishes emit low Volatile Organic Compounds (VOCs) and are environmentally responsible. Ultraviolet finishing uses light instead of heat for curing and the benefits include no environmental pollutants or solvents to evaporate, increased chemical resistance and durability.

Long Cabinet Pulls Look Best

Cabinet knobs and pulls come in a variety of sizes, styles and finishes. But which ones should you choose?

You could decide to use all cabinet pulls. Or you may prefer the look of all cabinet knobs. Or you can mix knobs and pulls in your kitchen. Which one is right? They all are. All it comes down to is your personal preference.

Best Look

To achieve a cohesive & finished look, select a pull that's proportional in length to the cabinet door or drawer. Shorter doors & drawers use shorter pulls; longer doors & drawers use longer pulls.

Cabinet Care & Cleaning

- In order to maintain and protect the original beauty of the cabinets, clean at least once a month by gently wiping the surface of the cabinets with a soft, clean, damp cloth. Allow the cabinets to air dry.
- Do NOT use kitchen cloths or sponges that have abrasive surfaces, detergent or grease on them.
- Use common dishwashing liquids (not detergents) to remove grease or soil. Wipe clean with a damp cloth. Dry the cabinet thoroughly.
- Under routine kitchen use, the cabinets around the sink, range, oven, baseboards and dishwasher may become damp with splashes from water or spills. It's important to immediately dry the excess moisture to prevent damage to the finish of the cabinetry.
- Never use cleaners containing bleach, ammonia or abrasives on your cabinetry. These substances will damage the cabinet finish.
- Touch up scratches and dings on cabinetry with a touch-up marker.
- In the event that scratches and dings are still visible after using a touch-up marker, use a filler pencil. Fill in the scratch by rubbing the pencil over the scratched area and wiping away the excess with a soft, clean cloth.
- Do NOT use sandpaper or any other type of abrasive paper or material in attempt to even out a scratch. These abrasives will damage the finish on the cabinet.
